Check out the paid Ample Sound software HERE. Sampling Features: Size: 848mb, 16-bit 44.1 khz finger instrument library to suit different needs. DFD (Direct from disk) Rich Fingering Noise - more vivid and realistic. Each Cycle & Rhombic sampling structure – a separate sampling cycle for each sheet music layer and speed to increase sample utilization efficiency. Sustain, Hammer On & Pull Off, Palm Mute, Popping 5 Articulation. Technology: Capo Logic - Intelligent guitar playing. CPC (Customized Parameters Control) - each controller can be controlled by MIDI CC or Automation. Double Guitar - various samples on the channel L & R. Poly Legato and Slide Smoother. Alternative tuner. Capo - Transpose without having to modify the midi. Strummer: Real strum samples. 14 strum notes + 28 ways to play for each chord. Strum Legato - legato articulation can be played during buzzing. 4 humanization settings. Select and detect 2 chord modes, any chords can be customized. SEQ strum with customized rhythm. Delicate presets with drag & drop support. Card Reader: The card player can load and play several common guitar tablature file formats. Users can load, view, and play any specific path inside a tablature file. When used in DAWs files, the card player also allows users to export the tablature as an audio file. Tab Player supports all fingering, looping, chords, articulations and other markers in a loaded tablature. Supported articulations include: Strum, Natural Harmonic, Artificial Harmonic, Hammer On/Pull Off, Trill, Bend, Tremolo Bar, Legato Slide, Slide In, Slide Out, Vibrato, Tremolo Picking, Palm Mute, Popping, Tapping, Let Ring, Staccato, Dead Note, Grace Note, Ghost Note, Accentuated Note, Fade In, etc. As a built-in feature, Tab Player works seamlessly with the Ample Sound instrument engine, which has an extremely customized guitar logic to model the guitar played in the real world. The card player can even judge himself to automatically add several refining articulations when he deems it appropriate, such as hitting strings or body or other realistic and necessary sounds. Strumming is an important factor in playing guitar. With the Ample Guitar Strummer engine, Tab Player can not only mix different articulations in the buzz, but can also switch between the buzzing of several strings (i.e. multiple notes) of notes) and strum on a specific string (i.e. one note). System requirements Windows: Windows 7/8/10, only 64-bit (32-bit not supported). Mac: From 10.9 or more VST2, VST3, AU, AAX and stand-alone host. 10GB hard drive, Intel i5 or later.
